Smart automated production
Recycle program available

THE POSSIBILITIES ARE ENDLESS

A better environment starts with true innovation...

THREATS AND SOLUTIONS

As of 3rd of July 2021, single use plastic items for which affordable alternatives exist – which includes plates & cutlery, - are banned from use in the European Union.

Airlines and caterers are obliged to comply with this regulation regardless of the origination of the flight. If you are landing in the EU, you cannot off-load or use return flight plastics.

Sola has the solution. An affordable, totally environmentally friendly solution that is immediately available and is both recyclable and reusable.

Sola The Netherlands believes the only reasonable and sustainable way to replace plastic cutlery is replacing this by a stainless steel version. We have developed a complete range of 3 cutlery designs that can be the solution for you.

ADVANTAGES AND OPTIONS

The advantage of using stainless steel is that it is a natural product. The total production process is cleaner versus plastics, especially due to the recycling. Stainless steel is a circular/fully recyclable product. If left in the environment, it will return back to its original natural shape, without polluting the air, water or soil. Stainless steel is a rotatable product and has a more luxurious look compared to plastics.

TECHNICAL DATA-SHEET

Material:	18/0 Stainless steel
Thickness:	0,5 mm.
Production process:	Fully automatic, flexible in volumes, with back-up lines
Food safe:	Option to have the cutlery washed prior to packing for food safe handling
Recycling:	Option to have the product collected for recycling
Packaging and shipping:	1.000 pcs per carton, in 1 strong polybag , to any location world-wide

MANHATTAN

	Length	Thickness	Weight
Knife	165 mm	0,5 mm	8 grams
Fork	167 mm	0,5 mm	7 grams
Spoon	166 mm	0,5 mm	9 grams
Teaspoon	126 mm	0,5 mm	5 grams

PALM

	Length	Thickness	Weight
Knife	165 mm	0,5 mm	8 grams
Fork	167 mm	0,5 mm	10 grams
Spoon	167 mm	0,5 mm	11 grams
Teaspoon	130 mm	0,5 mm	7 grams

OASE

	Length	Thickness	Weight
Knife	165 mm	0,5 mm	8 grams
Fork	167 mm	0,5 mm	7 grams
Spoon	167 mm	0,5 mm	11 grams
Teaspoon	130 mm	0,5 mm	7 grams
